

## Analysis of Touch

### Dance Piece I Chose:

Touch

### Theme or Message of the Piece:

Touch is about the importance of touch between two people and explores the emotions they have towards one another.

<b>Additional tools:</b>	<b>Where/How I would include these in my piece:</b>	<b>How it would add to the theme or message of the piece:</b>
Lighting	In clip 2, the light projections swirled in a circle around the female dancer.	This highlighted how she was separated from the male dancer. When he moved, he kept his movements around the periphery of her circle of light.
Costumes	In clips 1 and 3, the female dancer is wearing a dance top that leaves her arms bare.	The exposed skin highlights the need for skin-to-skin contact (i.e., the importance of touch).
Sound effects and/or Music	Instrumental music.	Music without lyrics helps keep the focus on the visual components.
Multimedia such as backdrop projections, videos, etc.	In clips 1 and 3 multimedia projections of the female dancer were used.	In clip 3, the projection helped to focus the audience's attention on the skin-to-skin contact of her hands brushing across her back.
