

Scenario Questions

Scenario A

Student A is finding it difficult to concentrate and is having trouble sleeping, is not eating well and is more willing to be alone than with their friends. Last week, you noticed Student A crying in the bathroom and taking unidentified pills.

Mental health or mental illness	Explain your choice:
--	----------------------

Scenario B

Student B is always concerned about getting sick. Student B washes their hands more than 20 times a day telling their friends that they cannot afford to get sick and will not touch any surface at school without sanitizing their hands first. Student B is constantly reminding friends about the need to avoid germs and stay clean. You notice Student B's hands sometimes bleed due to the persistent washing.

Scenario Questions

Scenario C

Student C belongs to the same teams and clubs at school as Student F, but Student F notices that each year around January, that Student C isolates themselves, skips team practices without any notice and goes straight home after school. Student C just does not quite seem to be themselves and the odd thing is that this seems to happen around the same time every year.

Mental health or mental illness	Explain your choice:
--	----------------------

Scenario D

Student E has been feeling nervous about an oral presentation for their business class later in the week. They are having trouble eating and sleeping and continuously go over their presentation making small changes. They have made the decision to not attend the dance with their friends the night before the presentation.
