School of Rocks

By Lori Friesen

If your school is made of bricks,
it is made of rocks!

Bricks are made of rocks.

If you walked to school,
then you walked on rocks!

Sidewalks are made of concrete,
which is made from rocks.

When you write with a pencil,
you are writing with a rock!

The lead from your pencil is made from a rock called graphite.

At recess, do you play with sidewalk chalk?

Chalk is made from rocks!

Even the sandbox is filled with rocks!

Sand is made from many small rocks.
