

Task 1: Greater than 20

1. Complete the fact family shown below. The number represented by the square must be a number greater than 20.

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square = \square + \square$$

$$\square = \square - \square$$

2. Show the relationship to be true by representing it using a tool of your choice.
