

Tricycles and Bicycles Activity

Show your work. Record your thoughts and answers below.

Tricycles have only 3 wheels each.

Inside a store, there are 4 tricycles on display, and 6 bicycles on display in another section of the store.

1.) Which section has more wheels?

2.) Use the numbers in the problem to help you explain how multiplication and division are related and how you can use that relationship to show if expressions are equal or not.
