

Making Relative Frequency Tables

1. A learner conducts a survey to determine the day of the month people are born in their friend group. The learner lists it in an array:

7	5	4	21	14	13
6	7	16	31	30	8
4	4	6	28	4	5
8	17	15	7	5	7
4	7	5	29	4	5

Using the data about the month people are born, create a relative frequency table.

Day of the month	Tally	Frequency	Relative frequency
