

Discrete or Continuous Data Chart

Place each description of a data set into the correct category on the chart. For each, you are deciding whether they are discrete or continuous data.

Discrete	Continuous

- The number of cars on the road.
- The length of various objects in a classroom.
- The number of students in a class.
- The time it takes to run a race.
- The number of buttons on a shirt.
- The result of rolling 3 dice.
- The height of a tree.
- The number of petals on a flower.
- The mass of a car.
- The number of adjectives in a paragraph.
