

## Weather 2

<p><b>Not-Sunny Weather:</b> On your first turn, you have eliminated sunny weather. Now it's your second turn. When you press the button, what is the probability of revealing weather that is NOT sunny? Express the probability in the following ways:</p>		
<p><b>Fraction:</b></p>	<p><b>Decimal:</b></p>	<p><b>Percent:</b></p>
<p><b>Where does this event fall on the probability line?</b></p>		
<p><b>If you press the button 10 times in a row, does the probability change?</b></p>		
<p><b>BONUS: What is another example of a dependent event?</b></p>
