

Task 1 and 2

Task 1: Graphing Real World Situations

Examine some news websites today and find examples of at least two different types of graphs that you learned about in this lesson. Analyze the graphs. Describe one piece of information you can learn from each graph.

Task 2: Reflection in your Math Notebook

How do you choose what type of graph best suits the data you gather? Why can't the same type of graph be used for all types of data?
