Environmental Fair

A local community centre is holding an Environmental Fair as part of Earth Day celebrations. It will include a small pop-up stand of environmentally friendly products. A community member has been given a budget of $50.00 to spend at the pop-up stand to buy supplies for their classroom. Create a number sentence that details what they will purchase, how many, and the remaining funds if there is any. Here's an example:

$(4 \times 2) + (3 \times 7) + 12 + 8 = 49$

If I buy four soaps, three hand creams, one tote bag, and reusable cleaning cloth, I will spend $49.00 and have $1.00 left over.

Environmental Fair

Use the following chart for information about the items available and their cost:

Items	Costs
Cloth tote bag	$12.00
Water bottle	$10.00
Hand cream	$7.00
Soap	$2.00
Dish soap	$4.00
Surface cleaner	$5.00
Glass cleaner	$6.00
Reusable cleaning clothes	$8.00
