

Fraction Additions

Solve the following addition problems, using the lowest common denominator and a number line.

$$\frac{1}{3} + \frac{7}{4}$$

$$\frac{1}{2} + \frac{7}{8}$$

$$\frac{3}{5} + \frac{1}{3}$$

Fraction Additions

$$\frac{2}{3} + \frac{1}{4}$$

$$\frac{5}{8} + \frac{3}{5}$$

If possible, compare your answers with a partner. How did you solve these problems? Are there any other strategies you could have used to add these fractions?
