

Table of Planets

The following is a table of the minimum and maximum surface temperatures of some planets in our solar system. For each planet, how could you determine the following?

- The difference between the minimum and maximum surface temperatures.
- The average surface temperatures.

Planet	Minimum Surface Temperature (coldest it gets)	Maximum Surface Temperature (warmest it gets)
Mercury	-170 °C	449 °C
Venus	-364 °C	427 °C
Earth	-89 °C	58 °C
Mars	-125 °C	20 °C
