

Perspectives of 3D Objects

Object A		
Front view	Side view	Top view
<div></div> <p>The front view of the object has 9 squares. It creates a closed shape, with 10 sides. I count 10 right angles.</p>	<div></div> <p>The side view of the object has 4 squares. I notice it also creates the shape of a rectangle, but the position is vertical compared to the top view. Since it is a rectangle, I know that it has 4 sides, 4 right angles, and 4 vertices.</p>	<div></div> <p>The top view of the object has 4 squares. I notice that it creates the shape of a rectangle. Because of this, I know it has 4 right angles, 4 sides and 4 vertices.</p>
