

Create the Shape Using the Criteria Given

Create the Shape Using the Criteria Given

Describe or create the shape using the criteria given: a triangle where one of the coordinates is $(3, 5)$, and the shape spans over 2 quadrants on the Cartesian plane.

Describe or create the shape using the criteria given: a square where one of the coordinates is $(-7, 3)$, and the shape spans over all 4 quadrants.

Describe or create the shape using the criteria given: a trapezoid where one of the coordinates is $(-5, -6)$.

Describe or create the shape using the criteria given. If possible, share your shapes. What other points did you use for the shape? Did others have the same points? Why could they be different?
