

Garden Design

Design a garden plan by recording and labelling the following features on the grid.

Remember to account for the scale of the garden plan so that your design is accurate.

	A patio near the house with a base of three metres and a height of one metre
	A flowerbed along the wall with a base of one-point-five metres and a height of one metre
	A path next to Fence A going from the patio to the flowerbed with a base of one metre
	A playhouse behind the trellis and next to Fence B with an area of two metres square
