Experiments with Columns

Predict I can make a prediction by... · Thinking about what I already know about the strength and stability of a structure. · Explaining what I think will happen.	Which column will be the strongest and most stable: square, triangle, or circle? Rank in order.

Experiments with Columns

Observation	What happened when each column was tested?
I can record observations by… · Using a diagram or detailed description (written or audio) of what happened when each column was tested · Recording as much detail as I can
