

My Pinecone Experiment

<p>Prediction: How do you think temperature will affect different pinecones?</p>	
<p>Observation: As you are exploring the video, record what happens to the pinecones before and after the temperature changes. Record changes in colour, size, shape, how open the scales are, etc. You can draw, write, or use an audio recording.</p>	<p>Before:</p> <p>After:</p>

My Pinecone Experiment

Results: What did you observe when the pinecones were exposed to different temperatures?

Reflection: Why do you think this happened? Do you think all pinecones would react the same?
