

"Let's Make a Machine!"

Engineering Design Process Activity – Let's Make a Machine!

Ask:

What do I know about simple machines?
What is the work that I want to make easier?

Plan: What will your design look like?

Create a labelled diagram and record your materials with the amount you need.
OR describe your design and how it will work.

Brainstorm:

What types of simple machines will I include, and how many?
How will the object, tool or device move?
