

Rotary Motion Machine

Engineering Design Process Activity – Rotary Motion Machine

Ask:

What do I know about simple machines and rotary motion?
How will this machine create positive changes in local or global communities?

Plan: What will your design look like?

Create a labelled diagram and record your materials with the amount you need.
OR describe your design and how it will work.

Brainstorm:

What type and how many simple machines will I include?
How will the object, tool or device move?
