

Insulators: Designing An Experiment

Purpose	What question are you trying to answer through your investigation?
Materials needed	What materials and equipment are needed?
Safety considerations	What should someone consider for safety before they begin, and during the experiment? (Hint: Eye protection, gloves, be careful around heat, etc.)

Insulators: Designing An Experiment

Procedure	What steps or instructions will you provide for the experiment?
Observations	How do you recommend recording observations?
Conclusion	What questions would you ask to draw conclusions?
