

Plant Conditions Activity

1. Describe or illustrate each different part of a plant (roots, stem, leaves, flower, etc.).

How can each part help the plant survive?

Plant Conditions Activity

2. Choose an extreme weather condition:

How can each part help the plant survive?

- flooding
- earthquake
- wildfire

You may also choose another extreme weather of your choice.

Then, reflect on how it can affect the plant's ability to survive.

For example, what might happen to seeds planted in soil after an earthquake?
