

How It Works

Sport	Simple machine	How it works
archery	pulley	the pulleys on a compound bow make it easier to pull the bowstring back
rowing	lever	the levers in rowing (the oars) help the rowers move the boat and fast

How It Works

Sport	Simple machine	How it works
cycling 	wheel and axle 	the wheel and axle on the hand cycle help the athlete to move a further distance, and faster, with less effort
alpine skiing 	inclined plane 	the inclined plane connects the top and bottom of a hill or mountain. It allows the skier to slide down the hill
