

Designing a Natural Structure

Create a design for a natural structure by recording answer to the following questions using a method of your choice.

What structure are you building?	Your ideas...
<p>Imagine Brainstorm some possible designs of your structure.</p>	<p>What materials will you need?</p> <p>How will you test if your structure is stable?</p>
<p>Design Make a diagram, or create a detailed audio or written description, of your design. Be sure to include a detailed description of what materials are located where.</p>	

Designing a Natural Structure

What structure are you building?	Your ideas...
Reflect	<p>Why did you choose the materials that you did to design and possibly build your structure?</p> <p>How would you test the stability of the structure?</p> <p>What do you think you would need to change about your structure in the future?</p>
