

Designing a Green Structure

Create a design for a green structure by recording answer to the following questions using a method of your choice.

What structure are you building?	Your ideas...
Imagine Brainstorm some possible designs of your structure.	What materials will you need? How will you test if your structure is stable?
Design Make a diagram, or create a detailed audio or written description, of your design. Be sure to include a detailed description of what materials are located where.	

Designing a Green Structure

What structure are you building?	Your ideas...
Reflect	<p>Why did you choose the materials that you did to design and possibly build your structure?</p> <p>How would you assess if your structure is considered 'green'?</p> <p>What do you think you would need to change about your structure in the future?</p>
