

Lab Sheet: Ocean Level Rise

Materials needed	<p>You will need:</p> <ul style="list-style-type: none">• two drinking glasses/cups of the same size if possible• water• two ice cubes• small funnel
Hypothesis What do you think will happen?	
Procedure	<ol style="list-style-type: none">1. Grab two drinking glasses/cups of the same size.2. Place two ice cubes in one of the glasses/cups and fill with water to the top.3. In the second drinking glass, fill with water to the top.4. Over the second glass, hold a small funnel with two ice cubes, and allow them to melt.5. Then, record your observations in a method of your choice.

Lab Sheet: Ocean Level Rise

<p>Observations</p> <p>*Remember observations can be recorded with pictures, numbers, and/or words!</p>	<p>Create a diagram of what you observed from the experiment.</p>
<p>Conclusions</p>	
<p>Questions</p>	<p>What happened in this experiment?</p> <p>How did this experiment connect to your learning about the Albedo Effect?</p>
